

party

Vote for us! Why? Well look ahead!

Less fossil fuels

You may ask how are we going to do this

Well we are going to stop producing cars that uses gasses and oils and we will start producing electric cars only

More bulk food packets in supermarkets

What will this do?

It will stop our rivers, lakes and oceans from being so polluted and that will have a large impact on our new zealand sea life and the waterways

And that would be great!!!

We will host at least 5 Community planting groups per city

We will allocate places for them and we will plant varieties of fruit vegetables and flowers our party thinks this will be great for new zealand and the economy

their life isn't less important than yours

Tax for cutting down trees

If you cut down a tree we will make you pay tax because if we don't have any trees we can't breathe and climb them.

We are going to plant new trees so we don't lose air if people are going to pay taxes and destroy trees.

Drive your cars less

You need to drive your cars less because you'll use less petrol to save the animals and see animals. But you worry because people are already making electric cars so you'll use less petrol. Jet those electric cars can DRIVE THEM SELVES!

← modern day car. || Electric cars

|| (Self-Driving cars) ---->

The Tesla ----->

Pandas are breaking too many branches and there are heaps of forest fires so we are giving them new homes.

We will have at least 12 trees per 1 kilometer

WE ARE OPPOSED TO OIL DRILLING AND EXPLORATION ON OUR COAST

We shall partner up with the organisation greenpeace and stop deep sea oil drilling to help our

The new tech helps us to build a better future for new zealand by making drones and creating less oil powered cars and on fridays sending out fishermen to get rubbish as well as the drones

Sea pollution

We are going to let out solar paneled drones with nets that collect rubbish and we will also send out fishermen every friday to collect the rubbish that the drones cannot reach.

2017

2050

More tax for the amount of pollution

Keep our rivers clean

Every river will have two river cleaning machines

All homes will have solar panels by 2030

Plant the Idea of
a Better Future
